  - Summer Fruits
  - Bugs & Insects
  - Beach Rocks & Shells
  - Sea Animals
  - Marine Life

- Songs +Videos on YouTube
- Oh, Mr. Sun, Sun, Mr. Golden Sun
  - A Sailor Went to Sea

### Summary of the learning experience in June:

**Mr. Golden Sun**

Summer's here and we're welcoming it by working on a big yellow ball to represent the sun. This will be a collective work using white glue, newspaper, and yellow paint. We'll be displaying it in the Atelier till the end of summer.

**Fruit Party in a Bowl!**

Our little ones will get into the kitchen action by preparing a big bowl of fruits

**Starfish, Starfish:**

We're creating our own play dough from scratch! We'll be mixing flour, water, and salt and molding it in the shape of small starfish for our beach sensory bin.

Note: 

Professors, student teachers, and scholars come on regular basis to observe, implement, and collect data information for research purposes.

Birthdays

-None

**Home- School Partnership:**

- Read a story with your child about the seasons of the year and discuss the characteristics of summer season.
- Let your child be involved in the kitchen and ask him to prepare a fruit salad with you for the whole family!
- Why buy Play-dough from stores when you can let your child create his own from scratch? You can try making slimes, play-dough, and even plastic via easy YouTube Tutorials.
